Claim 3, Line 1 "3" has been changed to -- 2 --.

Claim 8 , Line 4 -- said -- has been inserted before " drive ".

, Line 4 -- to said synchronous rectifier -- has been inserted after " signals ".

Line 6 -- that substantially prevents the drive switches from simultaneously conducting -- has been inserted after " level ".

Claim 15 , Line 13 -- that substantially prevents the drive switches from simultaneously conducting -- has been inserted after " level ".

In The Drawings

Note attached copies of the drawings corrected in red.

Authorization for this Amendment was given in a telephone interview with David Hitt on February 16, 2006.

REASONS FOR ALLOWANCE

The claimed invention of a synchronous rectifier transition-isolating drive circuit is found to be allowable over the prior art since drive circuit comprising a circuit that increases the turn-off voltage of the drive signals provided to the drive switches of the synchronous rectifier to a level that substantially prevents the drive switches from simultaneously conducting was not found to be singularly or collectively taught by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
